

COMMITMENT ACTIONS

FOR

THE GREEN CHURCH INITIATIVE

OF

THE NORTH CAROLINA ANNUAL CONFERENCE
Of the United Methodist Church

Commitment Actions for the Green Church Initiative

“The earth is the Lord’s and all that is in it, the world, and those who live in it...” (Psalm 24:1)

The scriptures are full of references to God’s creation and to humanity’s relationship with it. The Green Church Initiative (GCI) is a covenant congregation program that empowers a local church to live out its faith, given the Biblical mandate to care for and be good stewards of all that God has so lovingly created.

Introductory Information

The categories chosen for this GCI are representative of the total life and ministry of a congregation. We want a Green Church to understand that everything it does in ministry is connected to God’s creation; in other words, caring for creation is so fundamental to who we are as Christians that it must necessarily be infused into every aspect of the life of a congregation.

Purpose

This document is a supplement to the Green Church Initiative document. It contains a comprehensive collection of all actions a congregation can take and is divided into the categories of Worship, Discipleship, Stewardship, Evangelism, and Mission. A congregation can earn one point each, up to five extra points in the point tabulation for Green Church credit for each of the actions they accomplish that are not included in the actions in the Green Church Initiative document. A few examples are A-1, C-1, C-4, D-1, E-3, E-9, F-1, F-4, G-1, H-2, H-4, and J-3 below.

If you have ideas that are not included in the GCI, you can petition Conference Creation Care Ministry Team to have your ideas included as well so you can earn points for your own creativity.

In some instances, the same item is listed in multiple categories because it is pertinent to different aspects of the life of the congregation; for example, a church garden can be a mission project in that it helps to feed the hungry, and it can also be an evangelism tool in that its very presence can attract people to that church. Hence it belongs in more than one category. However, you can *only* get points one time for such an item, so you can choose the category in which you want to take the points.

Covenant Commitments

Actions

Worship

A-1	At least once each year, devote an entire worship service to the celebration and honoring of God's creation. This "Earth Sabbath" or "St. Francis Sunday" or "Festival of God's Creation" includes a special focus on God's creation with sermons, prayers, music, children and other activities.
A-2.	In addition to the annual Earth Sabbath service, incorporate creation care activities into worship on an ongoing basis (do at least three times per year, before earning credit, for any letter below).
a.	Pray for God's creation; include prayers that are inclusive of stewardship and praise of God's creation by both clergy and laity.
b.	Select hymns that have creation care and creation praise themes for regular inclusion in the music of the church.
c.	Plan a creation-centered anthem or solo.
d.	Choose scripture readings that include God's creation themes.
e.	Include creation care themes in children's messages or similar child-focused activities.
f.	Include creation care and stewardship themes in sermons throughout the church year by clergy or laity.
g.	Show a video segment that includes creation care.
h.	Incorporate liturgical dance and/or drama that celebrates creation using church members and/or local artists.
i.	Include a prayer of confession for your congregation's exploitation, pollution, and/or neglect of God's creation.
j.	Include creation care in a mission moment.
k.	Use communion elements that are locally made with organic materials, including the chalice, bread and wine.
l.	Use live flowers and plants on the altar, using native and local materials as a priority. This requirement may include native alternatives to Easter lilies and Christmas poinsettias as well as the weekly altar flowers.
m.	Include petition prayers for God's creation.

A-3. Conduct a blessing of the animals service with the congregation and animals from your community.
A-4. Designate a Rogation Day for the church with a special service blessing the harvest.
A-5. Schedule at least one outdoor worship service.
A-6. Use sustainably grown palm fronds and compost them after use, or incinerate them and use the ashes on the next Ash Wednesday.
A-7. Conduct a blessing of recycling bins and compost containers to incorporate recycling as a part of worship.
A-8. Use at least 30% post consumer waste recycled paper for church bulletins, utilizing Certified Processed Chlorine Free and FSC-certified paper products; display recycling, chlorine free and FSC logos.
A-9. Create or purchase and display a creation care-themed banner for the sanctuary and other venues where worship services are conducted.
A-10. Use collection plates or bowls made locally and using earthen or fibrous materials made by congregation members.
A-11. Incorporate a "Season of Creation" into your church's liturgical year. For a four-week period during Ordinary Time, treat God's creation as a liturgical season like Advent, Christmas, Lent, etc. Celebrate Earth, Water, Air and Fire as gifts of God.
A-12. On United Methodist Women's Sunday, use the national UMW priority of Climate Justice, lifting up the hardships that climate change brings to some people in developing nations.
A-13. As a celebration of a baptism or a memorial after a death, plant a tree in honor or memory of a church member.
A-14. Include in your Thanksgiving service a litany of thanks for the harvest and the land that produced it (church members might bring food from their gardens or locally grown food to share with each other and the hungry.)
A-15. Schedule an outside speaker to preach on earth care topics.

Discipleship

B-1. Hold a training event on how to garden organically and sustainably.
B-2. Form a new Sunday school class or small group dedicated to the study of the intersection of faith and creation care.
B-3. Organize a creation-centered Vacation Bible School.
B-4. Conduct a weekend retreat for children, youth, and/or adults with a creation theme in order to raise awareness of God's creation.
B-5. Have a special study session (4-6 weeks) on a creation care issue.
B-6. Show a video that lifts up environmental issues.
B-7. Sponsor a creation care fair in which you invite outside organizations to do displays or booths that will help raise your awareness.
B-8. Invite an outside speaker with expertise in faith/creation to do a presentation for a group or groups within the church; optionally, involve neighboring congregations.
B-9. Visit another church in your area that has an active creation care ministry to learn from them some things they are doing (or to share what you are doing at your church).
B-10. Create a display or bulletin board lifting up creation care issues, and describe what your congregation is doing to raise awareness of creation care.
B-11. Include a creation care tip in each weekly bulletin and/ or each monthly newsletter (either printed or electronic).
B-12. Train your religious educators in the importance of including creation care in all classes and/or small groups. (Inclusivity is the intent here.)
B-13. Take a field trip to a creation-related facility <i>and</i> facilitate a faith-based discussion.
B-14. Create and publicize a creation care section of books, videos, or DVDs in your church library.
B-15. Sponsor training on Drawdown concepts including emphasis on elimination of HFCs, planting of trees, regenerative agriculture, educating women, family planning, renewable energy, and reduced food waste.

Stewardship

Establish a zero waste goal by [Year]

C-1. Develop a system to recycle paper, plastic, cans, and glass.
C-2. Recycle electronic waste, including compact fluorescent light bulbs, computers, cell phones, etc.
C-3. Publicize local opportunities to dispose of toxic chemical waste properly. Coordinate with your local waste management authority or local government.
C-4. Compost food scraps and other compostable items in a bin.
C-5. Conduct a trash audit. Learn what you could be recycling and how to reduce what you send to the landfill. Recruit a volunteer committee to monitor the waste for a set period of time and identify the recurrent materials that are going to the trash bin.
C-6. Use china plates and cups, metal utensils, and glass tumblers at church dinners and fellowship times. Alternatively, use compostable dinnerware; no Styrofoam.
C-7. Use cloth or recycled paper napkins at all church meals.
C-8. Organize an annual green sale.

Stewardship – Paper

D-1. For church publications, use paper labeled “Certified Processed Chlorine Free” and minimum 30% post consumer waste recycled fiber content. Display the recycling, and chlorine-free logos on the publication. (100% post consumer waste is goal.)
D-2. Purchase bathroom tissue, facial tissue, paper towels, and paper napkins made from minimum 30% post consumer waste recycled paper that is also Certified Processed Chlorine Free.
D-3. Purchase paper cups/plates/bowls/napkins that are compostable.
D-4. Reduce the amount of office paper your church consumes by at least 10% per year . Do an audit of paper use on a weekly basis and explore ways to reduce usage. Engage youth and other groups in the church in making this happen.
D-5. Produce electronic newsletters instead of, or in addition to, paper copies.
D-6. Minimize the use of the Sunday morning bulletin; show the order of worship electronically.
D-7. In the office, set printers and copiers to default to duplex printing.
D-8. Print on the back of one-sided “waste” paper.
D-9. Make paper that has been printed only on one side into scrap pads for use in the church.
D-10. Provide training for staff and laity on how to conserve paper.
D-11. Stop junk mail. Identify junk mail that is regularly received, and ask to be taken off the list.

Stewardship - Energy

E-1. Carry out an electric energy audit for your facility. Reduce electric energy usage by at least 10%.
E-2. Buy “green power” for your church, where available. Most electric utilities now offer consumers the opportunity to purchase “green power” certificates. Contact your utility to learn the details.
E-3. Generate your own renewable energy to account for at least 3% of your electricity usage. If renovating or conducting new construction, consider the installation of photovoltaic solar panels. Check with your utility about possible incentives.
E-4. If you plan to expand, remodel, or build a new church facility, become LEED-certified. Contact the local Green Building Council or seek architects, builders or engineers who are LEED- certified for more information.
E-5. Implement “walk, bike, bus or car-pool to church” Sundays at least four times per year. Get youth involved in organizing this activity.
E-6. Document that at least 10% of your members have reduced their home energy consumption by at least 10% over the previous year.
E-7. Install motion-sensing switches for indoor lighting and provide training for your sexton and/or others who are responsible for turning heat, A/C, and lights on and off on how they can contribute to saving energy.
E-8. Install a bicycle rack.
E-9. Replace at least 80% of incandescent lighting with LED’s with the goal of replacing all incandescent lighting. Install LED exit signs.
E-10. Register your congregation with Energy Star’s Portfolio Manager to benchmark your energy data and track your progress. http://www.energystar.gov/buildings/owners_and_managers/congregations
E-11. Install Solar Water Heater on church building

Stewardship - Water

F-1. Reduce the area of turf at your church by at least 20% by replanting it with native plants, gardens, etc. to attract wildlife and reduce storm water runoff.
F-2. Replace your roof with a "green" roof. (Consider a green roof for new construction or major renovation.)
F-3. Install waterless urinals and/or dual flush toilets.
F-4. Reduce your annual water consumption by at least 10%.
F-5. Serve no bottled water at any church function.
F-6. Use rain barrels to collect and distribute rain water.
F-7. Plant a rain garden(s). This is to reduce storm water runoff and retain water for groundwater recharge and natural filtering of surface pollutants.

Stewardship – Toxic and Hazardous Materials

G-1. Purchase and use only non-toxic, environmentally friendly cleaning products. Engage your church sexton, janitors or others involved with selection and use of cleaning materials.
G-2. Use no chemical herbicides, pesticides or chemical fertilizers in your landscaping.
G-3. Use only "green" (non-toxic) cleaning products, especially in the children's department, to clean carpet, paint, adhesives, toys, playground equipment, etc.

Stewardship - Food

H-1. Use locally-produced food for church meals.
H-2. Use ethically sourced meats.
H-3. Use food from ethical, regenerative farms.
H-4. Provide vegetarian options at church meals. Have all-vegetarian pot luck dinners and other meal events. Publicize widely and give awards for the best vegetarian meals.
H-5. Host a farmers' market. Consider conducting in cooperation with neighboring congregations or non-profit organizations.
H-6. Grow your own vegetables in a church garden. Create a garden space for your church and organize a volunteer committee to oversee the planting, care and harvesting of the garden. Decide who will receive the food that is produced.
H-7. Act as a drop-off site for CSA (Community/Church-Supported Agriculture).

Stewardship - Other

I-1. Encourage your stewardship committee to begin to include stewardship of God's creation, as well as stewardship of financial and other resources, as part of its programs. Make the connection between financial and environmental stewardship.
I-2. Include on your creation care ministry team the person responsible for purchasing supplies at your church, or train all staff and those using the building in eco-friendly practices.
I-3. Purchase recycled printer and recycled copier toner cartridges, or refill your cartridges, if appropriate.
I-4. Establish a church policy to purchase supplies having reduced packaging.
I-5. Do a light pollution audit of the external part of the church building and other property. Reduce or eliminate night sky light pollution sources. More information on night sky pollution may be obtained from The International Dark Sky Association.

Evangelism

J-1. Give each guest a "green" gift (examples: LED bulb, re-usable shopping bag, etc.) publicizing Creation Care.
J-2. Use rain barrels to collect and distribute rain water. (See F-6 above.)
J-3. Plant a vegetable garden on church property. (See H-4 above.)
J-4. Install solar panels or a wind turbine which provide alternative power to your church and which are clearly visible from nearby highways.
J-5. Host and publicize a weekly farmer's market in your parking lot.
J-6. Invite secular non-profit environmental community groups to meet in your church.
J-7. Offer classes and other study opportunities that provide people in the community a way to connect faith and the environment.
J-8. Become a recycling drop-off point for e-waste (techno-trash).
J-9. Invite a secular environmental expert to do a presentation to which the community is also invited.
J-10. Document that at least one family or individual has joined your church because you have demonstrated a concern for God's creation.
J-11. Publicize your efforts to care for God's creation on Facebook, your congregation's Web site, the North Carolina Conference UMC or other denominational website, your local newspaper or other media.
J-12. Qualify to become a Certified Wildlife Area.
J-13. Commit your church to become a drop-off site for a local community-supported agriculture (CSA) cooperative, and publicize its availability in the community.
J-14. Host a blog on your church website to discuss matters of faith and creation.

Mission

K-1. Give energy-saving devices to the poor (insulation, programmable thermostats, LED's, etc.), and <i>install</i> them. Weatherize homes of low income people.
K-2. Plant a church garden, with the produce going to a local food bank or those in need.
K-3. Organize a local Community Supported Agriculture program to provide good, local, organic food for those in need.
K-4. If your church houses a free medical clinic or facilities for the homeless, give away local or organic food to patients/guests, along with education about healthy food choices.
K-5. Calculate the carbon footprint of your Volunteer in Mission trips for the year and offset them.
K-6. Train your mission volunteers on environmental issues specific to the places to which they will be going.
K-7. Provide at least two direct service opportunities per year for your congregation to be in service to God's creation.
K-8. Advocate for local, state and national policies that will reflect better care for the planet.
K-9. Use fair-traded and shade-grown organic coffee, tea and chocolate.
K-10. Sell fair-traded coffee, chocolate, cocoa, tea, etc.
K-11. Encourage United Methodist Women to study Climate Justice, the 2016/2017 Mission U study.
K-12. Provide annual financial support to a faith-based creation care organization.
K-13. Enter into a covenant relationship with a United Methodist missionary assigned to creation care work.
K-14. Partner with other area organizations to work together to care for creation.
K-15. Participate with the Society of St. Andrew in a gleaning project.
K-16. Participate in an international General Board of Global Ministries project that includes caring for God's creation.
K-17. Provide scholarships for elementary age children to attend a summer camp. Encourage local congregation to send kids to summer camp.
K-18. Partner with a local Native American tribe to do a project that benefits God's creation.
K-19. Volunteer a group in your church to monitor a local stream.
