The woman in the photo is Varsenik Kyureghyan. She has three children: two girls and one boy. Unfortunately, Varsenik lost her husband early; however, she found the strength in herself to move on with her loss and take care of her beautiful children. Now, she is working in the local hospital of Berdzor. On her pathway to providing a better life for herself and her children, Varsenik became one of the beneficiaries of the Agricultural Development Project of Project AGAPE, getting a cow to support her family.

In 2006, The Cattle Project started based on the established unique practice of passing on the gift of “Heifer Project International”. This practice ensures project sustainability, develops the community, and enhances the self-reliance of the people. In 2019, 16 more families received pregnant heifers and cows, making the total number of the families involved in Cattle Project, 212.

In 2019, 16 more families received pregnant heifers and cows, making the total number of the families involved in Cattle Project, 212.

The Cattle Project continues to provide the impoverished families in Berdzor and some villages, with cows that help to lift themselves out of poverty and become self-reliant. This project brought hope and many gloomy days for these families. Generous supporters of the UMC of NCC and WNCC made this kind of life-saving project possible.
