Free Equipment, free installation,  
lower energy bills and participation  
rewards.

Yours free just for joining EnergyWise® Business.

### With the easy-to-use Wi-Fi thermostat, you can:

- Automatically adjust your business's temperature using a tablet or smartphone
- Log in to our portal from anywhere, 24 hours a day, to monitor and adjust your thermostat
- Program normal open and close schedules or vacations and holidays
- Manage multiple locations easily
- Participate in one of the easiest ways to lower your annual energy expenses

### How it works for you

#### 1 You join

Call 866.821.8423 or visit us at [duke-energy.com/EWB](http://duke-energy.com/EWB) to join.

#### 2 You choose

Choose whether a switch or programmable Wi-Fi thermostat works better for your business. We'll give you a free device for each HVAC system you have AND pay for it to be professionally installed and programmed. You can also choose the level at which you want to participate.

#### 3 You save

Annual rewards are applied directly to your energy bill. You'll enjoy additional savings by taking advantage of the easy-to-use scheduling features of the Wi-Fi thermostat.

### You're helping the community

When there is a particularly high demand for energy, such as during peak usage on select summer days, we send a signal to your device to lower your central air conditioner's energy usage for a few hours, and it helps manage the demand on the grid.

### So many reasons to join:

- Lower your energy bill, \$50 to \$135 per AC unit each year
- A free Wi-Fi thermostat professionally installed and programmed at your convenience
- Your participation reward will be automatically applied to your Duke Energy bill
- Free 24/7 support
- Manage your thermostat anytime and anywhere with the Web portal
- You can program the Wi-Fi thermostat based on the season, which can result in savings on your heating and cooling bills
- Earn extra rewards by signing up for the winter program

**Remember:** Even if you don't own your own HVAC system, you may still participate. Program available for most nonresidential Duke Energy customers including nonprofit and governmental agencies.
